

Mobile Lite -R29

Portable Personal Emergency Response System

Advanced Mobile Lite-R29 is a 4G/LTE PERS locator that is equipped with Wi-Fi location tracking. Coming in a slim case design, the GPS tracker is a perfect companion to fit an active-aging lifestyle. Leveraging industry-certified A-GPS and Wi-Fi technology, Mobile Lite-R29 has improved location accuracy especially when users are inside the buildings. In addition to both GPS & Wi-Fi positioning technologies, Mobile Lite-R29 has built-in fall detection, providing comprehensive care for all seniors.

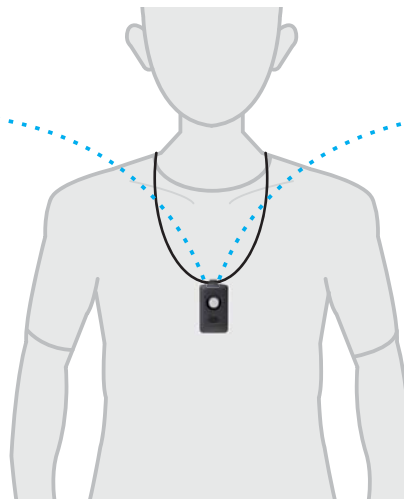

The positional information can be accessed via Intellihealth's online platform "My GPS Alert" on web portal or smartphone app, offering proactive engagement to users and their caregivers. When there is a need, with raised guidance buttons and voice prompts, users can open two-way voice communication immediately and learn the status of emergency reporting.

Mobile Lite-R29 is able to have RF devices integrated such as emergency pendants and wrist transmitters. Optionally wearing belt clip and neck lanyard, offering users more handy accessibility to take out. The lightweight, portable Mobile Lite goes beyond typical emergency response products by integrating both safety monitoring and telecare capabilities. These features make Mobile Lite-R29 the best companion for active, healthy, and worry-free aging.

How can Care Personnel and Family Members Locate You?

Positional information is available on Intellihealth's online platform & app "My GPS Alert."

Via the app, emails, or SMS messages, smartphones can be used to view the user's location information.

* Map service is powered by Google Maps data.
